

# DreamCatcher

## User Documentation

In order to run the application, first visit the [Continuous Deployment page](#) and download the latest .apk file on an Android phone or an Android Emulator. Then, go to the location where the file was downloaded and try running it through your method of choice. Depending on what your choice is, you might be asked whether to trust the application or not. In such cases, please do trust it.

Once you're done setting it up. Open DreamCatcher and you'll be welcomed by the **SIGN IN** page.

[PHOTO OF LOGIN PAGE]

If you have been given valid user credentials beforehand, you can use them in order to sign in , otherwise by clicking the bottommost button “Don’t already have an account? Sign up here” , you will be redirected to the **SIGN UP** page. After filling it in with your information you are ready to access the **MAIN** page.

[PHOTO OF SIGN UP PAGE]

In the **Main** page you can see the welcome text and 3 buttons. First button being “New Dream” and as the name suggests this will prompt you to the **NewDream** page. Second is “View previous dreams” by redirecting you to the **ListAllDreams** page. Last we have the “Logout” button that lets firebase know that the user wishes to end his session.

[PHOTO OF MAIN]

Your intent is to use the application as a dream journal, so the **NewDream** page accessed from the **Main** page is where you will be writing your dreams. This page provides an intuitive layout for the user, in the following order : -Title , -Text , -Mood. The Mood can be set depending on how your in-dream experience was. You have 3 choices : -Good , -Neutral, -Bad.

Once you've already written at least one of your dreams. You can press the "View previous dreams" button from the **Main** page, that will take you to the **ListAllDreams** page. Where you will be able to see all of your previously noted dreams in a list format. Each of the items/dreams from the list is an interactable object that shows the same elements you have noted at the time : -Title , -Your dream in text form , -Mood.
